M-SERIES CRAWLER DOZERS

EXPERTS FOR THE REAL WORLD SINCE 1842

- 1842** CASE is founded.
- 1946** Allis-Chalmers is the first manufacturer to introduce a torque converter on dozers. In the 30s they had invented permanently lubricated track rollers and sealed and lubricated tracks.
- 1951** First CASE dozer made in cooperation with ATC and promoted under Terratrack brand.
- 1956** CASE acquires ATC and is the first manufacturer to introduce tracks counterrotation on the 1000 Series Terratrack dozer.

HERITAGE

A TRADITION OF INDUSTRY FIRSTS

- 1974** *FIAT acquires Allis-Chalmers and in the 70s introduces the exclusive “Equistatic” geometry on bulldozer machines. In the late 90s CASE launches its exclusive “CASE Extended Life Track” undercarriage.*
- 2008** *CASE introduces the “Dual Path” hydrostatic transmission on the “K” series.*
- 2013** *CASE is the first to introduce SCR technology on the “M” series dozer.*
- 2015** *CASE extends its European product line-up with the new grader range.*
- 2017** *CASE renews its dozer range introducing a completely re-engineered undercarriage and "ULTRA-LIFE" tracks.*

M-SERIES CRAWLER DOZERS

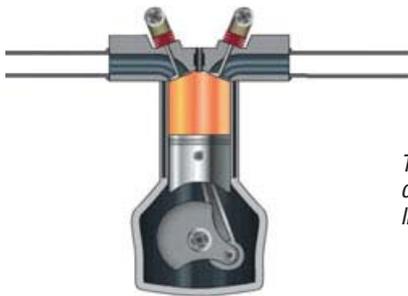

LOW EMISSIONS

Premium Tier 4 technology

The state-of-the-art common rail engine delivers top performance in load response, max torque, power and fuel economy.

The combustion is optimised for maximum efficiency: it occurs at high temperatures and uses 100% fresh, cool air, as the air intake is separated from the exhaust. The turbocharged engine with an Air-to-Air intercooler relies on well proven multi injection technology to maximize torque back-up and fuel efficiency with reduced engine noise and vibrations.

The high temperature combustion produces a very limited amount of particulates

AdBlue is sprayed in the exhaust in order to eliminate NOx through Catalytic Reduction (SCR)

Tier 4 interim

With SCR the engine runs with optimised efficiency. The M Series engine can run with 20% biodiesel, reducing even further its environmental impact. When the tractive effort grows and the rpm tends to drop, the engine power rises by up to 16% to 1800 rpm. The result: constant performance and higher pulling capacity. In addition, the ability to work with high torque at lower engine rpm reduces engine wear.

SUPERIOR COOLING EFFICIENCY

Fresh air breathing engine

The cooling package of the 1650M and 2050M has been redesigned and fitted with a hydrostatic reversible fan. In the new design, the radiators are mounted with no overlap, so that each radiator receives fresh air, maintaining constant fluid temperatures. The hydrostatic fan continuously adapts its speed to match the real cooling demand, reducing power absorption. The reversing mode reduces maintenance needs and lengthens cleaning intervals.

ENGINE AND TRANSMISSION DRAWBAR PULL LEADERSHIP

HIGH RELIABILITY

"ULTRA-LIFE" tracks

The redesigned undercarriage ensures higher stress resistance, and combines optimized dozer balancing for enhanced stability and controllability.

The exclusive "ULTRA-LIFE" technology with lubricated bushing extends chain and undercarriage life in toughest conditions and sensibly reduces the dozer noise level.

Considering that 50% of dozer maintenance costs are due to undercarriage components, the CASE solution brings a clear benefit for the most demanding customers.

M-SERIES CRAWLER DOZERS

VERSATILE CONTROLS

Agile and strong

The operator has full control of the massive power of the M Series dozer. The electrohydraulic joystick enables them to customise the reversing and steering sensitivity for faster and more efficient cycles. The decelerator pedal can be set to reduce either travel speed only or both travel and engine speed.

Automatic blade functions

The advanced electronics functions enable the operator to control specific functions in addition to the standard blade movements:

- the on-board computer can be set directly from the joystick;
- the blade reaction can be set choosing from 3 levels of sensitivity;
- the grading button immediately reduces the speed of the blade by 50% for more accurate soil contour;
- the shaking mode enables the operator to shed material quickly, especially when working with sticky soil.

HIGH VISIBILITY

Drive your performance forward!

The M series cab is engineered for operator performance, comfort and safety. The new positioning, further forward on the machine, ensures complete blade visibility. The operator can work with confidence and more productively in every operation. The air suspended seat is easy to adjust, providing every operator with a perfect working position. The powerful air conditioning system combined with the best-in-class noise level provide an excellent working environment, reducing operator stress during long working days.

CUSTOMIZABLE CONTROLS PRODUCTIVITY BOOSTING ELECTRONICS

BLADE CONTROL SET UP

Flexible performance

The M series is ready to work with the most common blade controls available on the market. The machine can be prepared in the factory for a specific configuration, ensuring perfect wire layout, visibility and component integration, guaranteeing the high standards of reliability of every CASE product are maintained.

HIGH VERSATILITY

Tools for every task

A wide offering of implements and equipments can be installed on the new CASE dozer:

- Drawbar • 3 shanks parallel ripper
- Front cab protections and grids • Winches predisposition

A choice of blades are available for optimum dozing performance:

- PAT • Foldable PAT (reduces the transport width within 3 m) • Straight • Semi-U

BULLDOZER “EQUISTATIC” GEOMETRY

Balanced pushing effort

All the Bulldozer units offer the patented «Equistatic» system that increases the tilting capability, while reducing the efforts on the pushbeams, increasing the overall frame reliability and reducing the overall wear of components.

QUICK GROUND ACCESS FOR SERVICING

SAFE AND EASY MAINTENANCE

Ground access for servicing

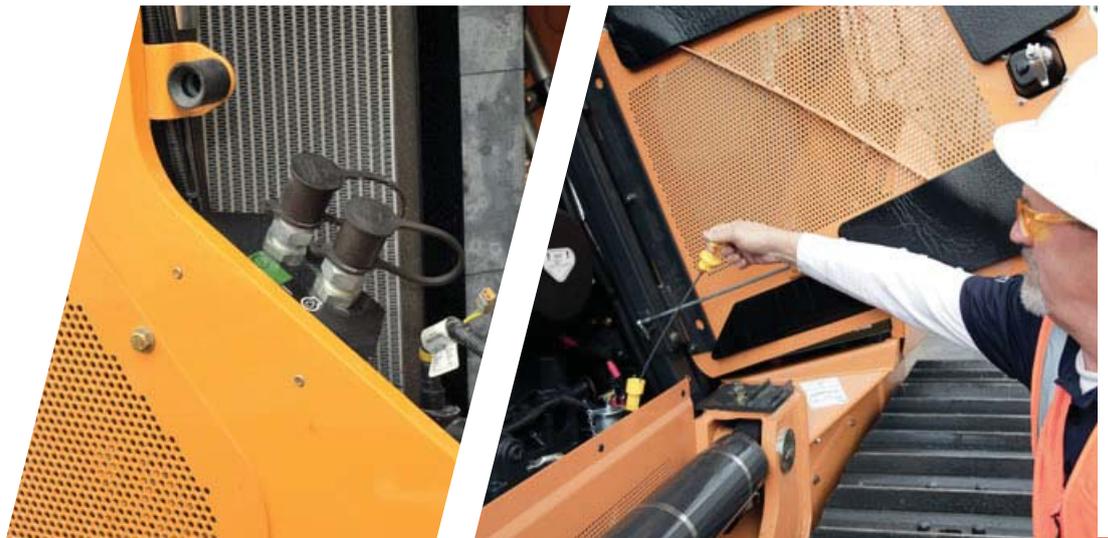

The hydrostatic transmission brings less complexity and lower maintenance requirements than a traditional one. Belly plates on the bottom of the machine provide excellent access to controls and transmission components.

The final drive installation on the main dozer frame enables dismounting while leaving the hydrostatic components in place. The transmission can even be reached through the cab floor, so it can be serviced directly on the jobsite.

The refueling points (Fuel/Ad Blue/Hydraulic Oil) are conveniently placed on the rear of the cab in a well-protected place. The daily maintenance can be done quickly thanks to dedicated steps that make the access easier and safer.

The new single piece main frame enables you to service the main controls easily from the ground, simply opening the wide lateral shieldings.

Oil levels, battery status, electric components, filters and the emergency cut off switches are rationally grouped and clearly identified with colour coding. With the M Series, you can quickly get ready for your working day.

THE SCIENCE BIT

The CASE SiteWatch telematics system uses a high-tech control unit mounted on each machine to collate information from that machine and from GPS satellites. This data is then sent wirelessly through the mobile communication networks to the CASE Telematics Web Portal.

SiteWatch: centralised fleet control benefits at your fingertips

Measure your true asset availability and optimise it

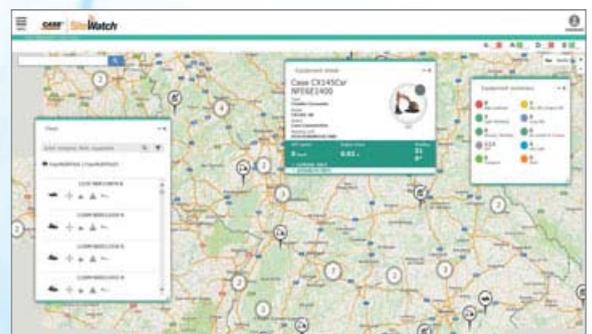

- Eliminate the “phantom fleet”: SiteWatch allows to identify spare units or under loaded machines on each site.
- Become able to reallocate units where they are more needed.
- Forward Maintenance Planning is easier since the actualised working hours are always available.
- Extend the benefits of SiteWatch to the rest of your fleet: SiteWatch can be installed on the units of other brands as well.

Challenge your Total Cost of Ownership!

- Being able to compare the fuel usage of different machine types will allow you choose the right equipment.
- Save on transport costs with planned and grouped maintenance tasks.
- Peace of mind, optimised uptime and lower repair costs: with preventive maintenance you can for example be alerted if the engine needs to be serviced and avoid a disruptive breakdown.
- Be able to compare your asset Return On Investment on different sites.
- Your equipment is used only during working hours. You can set up alerts so that you know if it is in use during the weekend or at night.
- Integrate with the programmed maintenance package, so that you can be sure every machine is at the right place at the right time.

More Safety, Lower Insurance Premium

- Keep thieves away: dissuade them from attacking your asset because it is geo-localised. SiteWatch is hidden so that thieves can't find it quickly.
- Your fleet is used only where you decide. You can define a virtual fence and receive an email when a machine exits that perimeter.

MAIN REASONS TO CHOOSE THE M-SERIES

LOW EMISSIONS

- The only dozer with SCR in the market: exceptional efficiency and fuel savings, no losses due to extra cooling needs.

EASY MAINTENANCE

- The functional groups are located beside the cab for quick intervention.
- The transmission components can be checked directly under the cab floor.

BLADE CONTROL SET UP

- Leading brands plug and play blade control system.

HIGH VERSATILITY

- The wide variety of options and bulldozers offers every customer the possibility of creating a machine tailored for the most demanding applications in different environments.

VERSATILE CONTROLS

- Electronically controlled fast material drop from the blade in sticky conditions. All the main working parameters can be set to satisfy customer requirements.

HIGH VISIBILITY

- The cab, positioned 100 mm forward, ensures best-in-class visibility on the blade corner as well as better bulldozer weight distribution.

SUPERIOR COOLING EFFICIENCY

- Double cooling surface and no overlapping of radiators. The reversible fan keeps the exchanging area clean and dramatically extends service intervals.

BULLDOZER "EQUISTATIC" GEOMETRY

- Emphasizes blade tilting while compensating twisting effort on the push beams device.

HIGH RELIABILITY

- CASE "ULTRA-LIFE" tracks dramatically reduces the cost of ownership by 50%. Noise level is also reduced for best-in-class comfort

CRAWLER DOZERS

1150M SPECIFICATIONS

ENGINE

Model	FPT F4HFE613F*A002
Cylinders	6
Displacement	6.7 l
Fuel injection	Direct
Fuel filter	Spin-on w/ in-line strainer
Air intake	Cross-flow
Cooling	Liquid
Engine speeds	RPM
High idle – no load	2200 +/- 50
Rated – full load	2200
Low idle	1100 +/- 25
Horsepower SAE J1349:	
Engine rated net power	127 hp - 95 kW @2200 rpm
Engine max net power	138 hp - 103 kW @2200 rpm
Engine peak power	151 hp-113 kW @1800 rpm
Rated net torque	610 Nm
Max net torque	632 Nm

Engine lubrication

Pump _____ Deep sump plate cooler w/ pressurized under-piston nozzles

Pump operating angle ratings:

Side-to-side _____ 35°

Fore and aft _____ 45°

Radiator:

Core size area (Water Radiator) _____ 0.32 m²

Rows of tubes _____ 25

Fan

Diameter _____ 660 mm

Ratio _____ 0,96:1

POWERTRAIN

Dual path hydrostatic

Pump _____ Variable axial piston

Motor _____ Variable bent axis piston

Max. drawbar pull* _____ 213.5 kN

Transmission _____ Single lever control electronic straight tracking

Oil filter _____ 2 micron, spin-on, replaceable

Travel speeds*

Forward _____ 0 – 9.3 km/h

Reverse _____ 0 – 9.3 km/h

Parking brakes _____ Heavy-duty, spring-applied, hydraulic pressure release

Steering brakes _____ Hydrostatic

Final drive _____ 2 helical gear reduction to planetary output

Ratio _____ 61.4:1

TRANSMISSION COOLING

Type _____ Oil to air

Core size _____ 0.18 m²

ELECTRICAL SYSTEM

Alternator _____ 120 amps

Batteries (2) _____ 12-volt, low-maintenance
925 cold-cranking amps @ -18°C

OPERATOR ENVIRONMENT

ROPS/FOPS cab; Pneumatically suspended seat; Seat belt; Adjustable armrests; Foot rests; Tool storage area; Headliner; Floor mat; Mirror; Noise level 79dbA.

Warning lights:

Air filter; Alternator; Diagnostic fault indicator; Engine coolant temperature; Engine oil pressure; Hydraulic filter; Low fuel level; Park brake engaged; Service soon indicator; Transmission filter; Transmission charge pressure.

Gauges:

Ad Blue Level; Battery voltage; Digital hourmeter/tachometer diagnostic/service reminder; Fuel level; Transmission oil temperature; Transmission speed indicator; Water temperature.

Audible warnings:

Engine coolant temperature; Engine oil pressure; Low fuel level, Transmission charge pressure; Transmission/hydraulic temperature; Rear wiper for cab; Internal mirror; Radio.

HYDRAULICS

Pump flow @ 2200 RPM _____ 138.5 l/min

Max pressure _____ 195 bar

ROPS/FOPS cab; Pneumatically suspended seat; w/ back adjustment; Seat belt; Adjustable armrests; Foot rests; Tool storage area; Headliner; Floor mat; Tilting seat platform; Noise level 77.2dba.

Warning lights:

Air filter; Alternator; Diagnostic fault indicator; Engine coolant temperature; Engine oil pressure; Hydraulic filter; Low fuel level; Park brake engaged; Service soon indicator; Transmission filter; Transmission charge pressure.

Gauges:

Battery voltage; Digital hourmeter/tachometer diagnostic/service reminder; Fuel level; Transmission oil temperature; Transmission speed indicator; Water temperature.

Audible warnings:

Engine coolant temperature; Engine oil pressure; Low fuel level, Transmission charge pressure; Transmission/hydraulic temperature.

HYDRAULICS

Pump flow @ 2200 RPM _____ 179.5 l/min

Max pressure _____ 248 bar

Lift Cylinder PAT _____ nr. 2

Bore diameter _____ 114.3 mm

Rod diameter _____ 63.5 mm

Stroke _____ 428 mm

Angle cylinder PAT _____ nr. 2

Bore diameter _____ 114.3 mm

Rod diameter _____ 63.5 mm

Stroke _____ 502.7 mm

Tilt cylinder PAT _____ nr. 1

Bore diameter _____ 127 mm

Rod diameter _____ 63.5 mm

Stroke _____ 148.3 mm

Lift cylinder Bull Dozer

Bore diameter _____ 88.9 mm

Rod diameter _____ 57.2 mm

Stroke _____ 1074 mm

Tilt cylinder Bull Dozer

Bore diameter _____ 114.3 mm

Rod diameter _____ 63.5 mm

Stroke _____ 98.9 mm

SPECIFICATIONS

SERVICE CAPACITY

Fuel tank	405 l
AD Blue Tank	62 l
Engine oil w/ filter	16.4 l
Engine oil w/o filter	15.6 l
Engine cooling system	38 l
Hydraulic reservoir	210 l
Final drive - per side	25 l
Track rollers - each	0.35 l
Front idlers - each	0.33 l
Carrier rollers - each	0.31 l

UNDERCARRIAGE

Track adjustment _____ Hydraulic
 Frame _____ Oscillating equalizer beam suspension and pivot shaft

Track link pitch

"Heavy-Duty" track	203 mm
"Ultra-Life" track	203 mm
Track shoe height	71.5 mm
Pin diameter	44.5 mm

Bushing diameter

"Heavy-Duty" track	72 mm
"Ultra-Life" track	93 mm
Track shoes per side	40 LT 45 XLT /WT/LGP

Track rollers per side

LT	7
XLT/WT-LGP	8
Carrier rollers per side	2
Track roller rail diameter	227 mm

TRACK ON GROUND

Shoe area	
610 mm	32856 cm ² LT
	38952 cm ² XLT
710 mm	46093 cm ² WT
760 mm	48690 cm ² WT
910 mm	58753 cm ² LGP

PAT BLADE

Variable blade pitch - adjustable	55° +/- 5°
Lift speed - per second	483 mm
Cutting edge	Reversible, replaceable
Width	200 mm
Thickness	20 mm

RIPPER

Max. penetration	491 mm
Width	1953 mm
Cut width	1889 mm
Max. ground clearance	577 mm
Max. number of shanks	3
Tooth spacing	
w/3 teeth	944 mm
Hydraulic cylinder	Double-acting
Diameter	155 mm
Stroke	596 mm
Rod	69 mm

OPERATING WEIGHT

Operating weight includes cab, full fuel and hydraulic tanks, 170 lb (77 kg) operator, "Heavy-Duty" chain, front pull hook, rear retrieval hitch, track guides, back up alarm, horn, lights, track shoe, C-frame and blade width as noted.

	Weight (kg)	Add-on weights	Weight (kg)	"Ultra-Life" chains	Add-on weights (kg)
Long Track	20213 kg PAT	Drawbar	66	24" (610 mm)	256 (LT)
	20206 kg Straight	Ripper (3 shank)	1933	24" (610 mm)	290 (XLT/WT)
	20336 kg Semi-U	Winch	1057	28" (710 mm)	228
Extra Long Tracks	20599 kg PAT			30" (760 mm)	268
	20592 kg Straight			36" (910 mm)	274
	20722 kg Semi-U			Center rockguard	
Wide Tracks	21269 kg PAT			LT	221
	21971 kg PAT Foldable			XLT/WT/LGP	306
	21431 kg Straight			Sweeps	63
Low Ground Pressure	22115 kg PAT				
	22790 kg PAT Foldable				
	22131 kg Straight
